MAXSORB SPILL KIT BINS

MAXSorb®

MAXSorb® Absorbents are a premium range of granular and woven absorbents, suitable for use in a wide range of industries and applications.

MAXSorb® Absorbents have become the preferred absorbent in many cutting edge workshops, from mining to aviation and large industrial sites.

MAXSorb® Absorbents can assist in cleaning up and containing spills on your site, whether on land, water, or right in your workshop.

MAXSORB® KITS

4 Excellent Reasons Why MAXSorb® Kits are the Market Leader

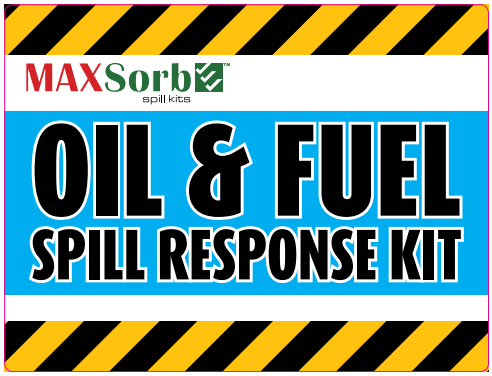
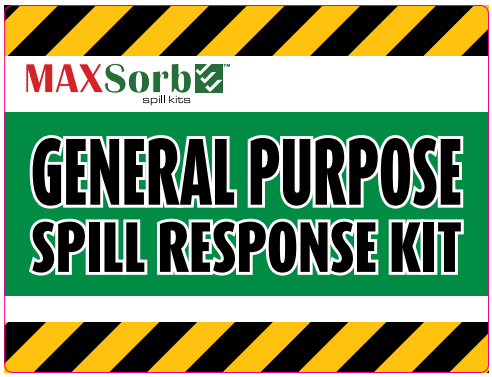
SPILL KIT IDENTIFICATION LABELS



OIL & FUEL

Oil and fuel aborbents take on board any hydrocarbon such as - petrol, diesel, oil, fuel, solvents etc. They are also designed to repel water, making them ideal for oil and fuel spills in any situation on land or water.



GENERAL PURPOSE

General purpose absorbents are universal in that they can soak up all oils and fuels, solvents, coolants, all water-based liquids and mild chemicals. An excellent addition to your spill response capabilities.

HAZCHEM

Hazchem Absorbents are specially formulated to absorb all chemicals and hazardous liquids. It will also absorb all water-based chemicals. A must have if you are storing chemicals of any nature or capacity.

MARINE

Marine oil and fuel absorbents are ideal for taking hydrocarbons off the surface of any body of water. They will still float even when fully saturated, giving you the means to tackle any size oil and fuel spill. Marine kits can be customised to suit any requirements, and bulk absorbents can be supplied on their own.
