LOCK OUT
FOR SAFETY

Contents

Our MAXSafe Lockout Range has been carefully put together, utilising leading global manufacturers and local experts to provide you with an extensive, easy-to-use, and durable range of lockout tagout supplies. We have over 450 quality MAXSafe products available in stock, including a wide selection of lockout padlocks & hasps in various sizes and colours. These can be customised to suit any application. Additionally, we stock a complete range of lockout tags that can be printed with your logo and messages.

Many workplace incidents/accidents could be prevented with the proper use of lockout/tagout products. Contact us today to explore how these products can be implemented on your site.
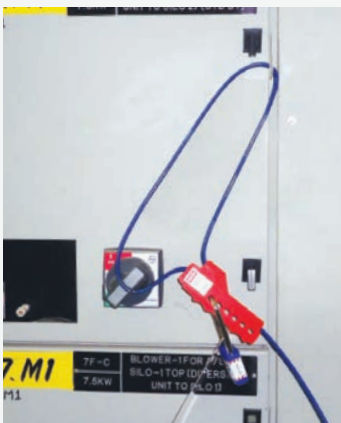

Lockout Hasps

The lockout hasp provides a tamper-proof method to ensure worker safety, as the energy source cannot be restarted until the hasp is removed. Accumax Global stocks a complete range of lockout hasps, with different sizes, colours, and styles to suit any application. We also offer customisation options to meet specific requirements (minimum order quantities may apply).

Vinyl Coated Hasps

Lockout Hasps are designed to allow multiple lockout padlocks to be used when isolating one energy source. The hasp is threaded thru the isolating point and closed. Each worker doing the maintenance/service work attaches their padlock thru the holes on the hasp and secures it in place.

» Accepts padlocks with a shackle diameter up to 6 mm. From 6 locks up to 24 locks can be installed on each hasp

» Manufactured from high tensile steel sheet which has been electro-plated to prevent rusting

Padlocks

Keying Options

1

Keyed Differently

Means that the key for one lock should not open another.

2
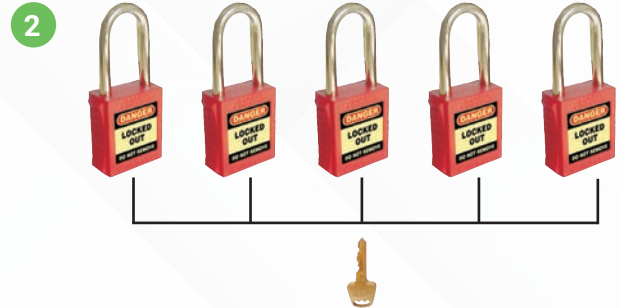

Keyed Alike

Means all locks in a set can be opened with the same key.

3
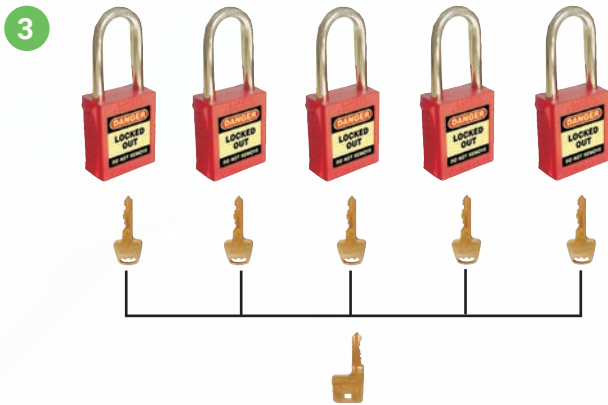

Master Key

Can be used to open multiple locks that are keyed differently.

MAXSafe® Padlocks are stocked in standard key combinations. These can be customized to any requirement and sets of up to 400 with Master Key are available.

Economy Lockout Padlock

Our Economy Lockout Padlocks come in a range of colours and styles available to suit most requirements. Available in 25mm and 75mm sizes.

Open Lockout Stations

Lockout Stations are designed to hold your entire Lockout Tagout products in one central location for easy access and identification. This enables organised and visible storage while promoting greater accountability and enhanced site safety. The stations are built to withstand tough environments and feature bold headings as a constant reminder of the importance of Lockout Tagout. We offer stations and cabinets that can accommodate 5, 7, 10, 16, 20, and 36 padlocks. Accumax Global provides a range of sizes and styles to suit various requirements, working in conjunction with all other Accumax Global Lockout Tagout products.

MAX-LKT03	Lockout Starter Kit

Group Lock Box

Simplifies lockout of large equipment and helps ensure maximum security for complex work team situations. After machine or process is locked out, the key or keys of the machine are placed in a lock box. Each authorised work team member places a personal lock on the group lock box. This ensures that no single employee has access to the box unless all employees have removed their locks.
