CoolWorker Cooling Vest

The first effective high-vis cooling vest in Australia.

Accumax has worked with manufacturers to design and provide the Australian market with a cooling vest that is high-vis and lightweight, effective in harsh Australian climates.

We have listened to our customers' needs and worked to provide them with a product to suit their requirements.

Product Features

- The CoolWorker vest contains 8 removeable freezable gel pouches, that will keep the user cool for an extensive length of time
- The vest has been mine site tested and provides up to 3 hours of effective cooling
- The versatile vest can be used in many applications, such as hot works, emergency services, first aid response, confined space and open pit work
- 100% polyester, with open mesh. It is durable and light weight; it can be worn over existing clothing without feeling like an extra layer
- 5cm reflective strips on both front and back and high-vis yellow, safe for day/night use
- Machine washable
- Adjustable straps for a firm fit, this provides effective cooling
