## DeliniMate

**Code:** MAX-GP1200, MAX-GP1500

Our Australian-made recycled plastic road delineators are the perfect choice for your site roads requirements. With their excellent durability, 100% recyclability, ease of installation & highly cost effective price tag, DeliniMate is the most environmentally conscious choice, for an essential item.

## Features

- Made from 100% recycled plastic.
- 1200mm or 1500mm long
- Comes with either CLASS 1 reflective 50mm x 200mm red and white delineators.
- 45-degree cut on the bottom to help it drives into the ground.
- Fits over 900-1,650mm metal/FRP star pickets, or simply on top of BaseMate, leaving NO sharp edges for optimal safety.
- Packed in bundles of 10 and wrapped in 100% recycled PE bags to keep them clean.
- The triangle shape of the post stops it from twisting to avoid the post facing the wrong way.

## IllumiMate

**Code:** MAX-IMLED

IllumiMate is the next generation of roadside illumination in the outback, mining and very dark areas.

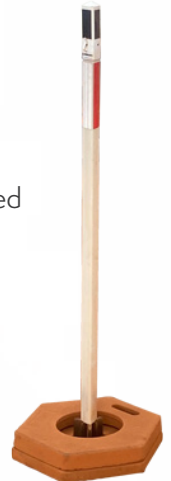

All the solar panels are vertical and no dust will hold on to the panels to block out the light and reduce the charging.

The IllumiMate comes in a set with a translucent DeliniMate & BaseMate ready for QUICK, EASY and RELIABLE roadside marking.

The IllumiMates are mainly used to show road users where the intersections are and driveways and exits off gravel roads. This reduces the need of lighting towers at every intersection.

## Features

- Fast setup
- No ground penetration
- No tools or hitting implements required
- Recycled plastic materials
- Night-time Illumination
- Easy to store and transport
- Aussie made
- Highly cost effective
- No sky facing solar panel

# Minesite Guide Post System

## BaseMate

**Code:** MAX-MMBM

The BaseMate is designed so there is no need to penetrate the ground eliminating the risk of hitting power or any other services. BaseMate will fit any of the standard roadside weights on the market. BaseMate can also be buried using the dirt and rocks if there are no bollard weights available.

## Features

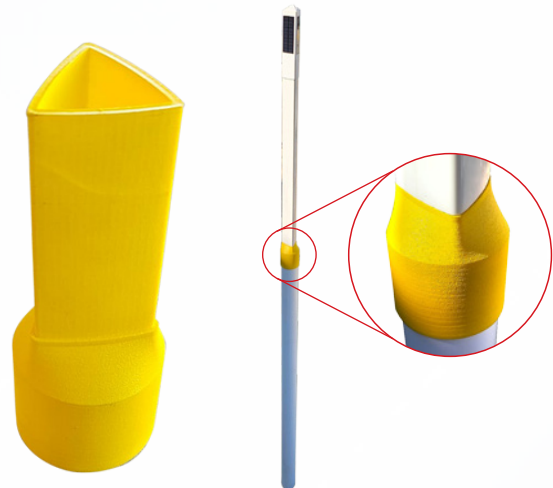

- The BaseMate is made from 100% recycled plastic and are in black to increase the UV resistance
- The BaseMate is designed for areas that are close to underground assets like power, water and gas etc or areas that are too hard to penetrate
- Simply put a 8kg weight over the top to hold them down
- There are holes in the base if tent pegs are needed
- The BaseMate can hold FRP star pickets or normal steel star pickets

## AdaptaMate

**Code:** MAX-AMLED

**Description:** AdaptaMate – converts round guidepost with no tools

AdaptaMate is a LED kit that converts the standard 50mm round guidepost with no tools required. With the AdaptaMate you can show exits and intersections at night with a flashing pole utilising your current guidepost system. The AdaptaMate is a kit with 1 x LED flashing light, 1 x 500mm long post and 1 x AdaptaMate sleeve to adapt the IllumiMate light.
