Flammable Liquids Storage Cabinets

Some liquids have the potential to catch fire easily. Flammable liquids have a low flash point, which is the minimum temperature at which a liquid can ignite and produce a flammable vapour. Our flammable liquid storage solutions are specifically designed and labelled for safe storage of flammable materials. They are designed with features such as ventilation systems, grounding mechanisms, and self-closing doors to enhance safety.

Indoor Flammable Liquids Storage Cabinets

MAX-FC250

MAX-FC30

MAX-FC100

MAX-FC160

Product Code	Description	Size	Dimensions
MAX-FC30	Flammable Storage Cabinet	30L	800 x 505 x 500mm
MAX-FC100	Flammable Storage Cabinet	100L	800 x 1100 x 500mm
MAX-FC160	Flammable Storage Cabinet	160L	1295 x 1100 x 500mm
MAX-FC250	Flammable Storage Cabinet	250L	1825 x 1100 x 500mm

Large Capacity Flammable Liquids Storage Cabinets

MAX-LFC1000

MAX-LFC450

MAX-LFC850

Product Code	Description	Size
MAX-LFC450	Flammable Storage Cabinet	450L
MAX-LFC650	Flammable Storage Cabinet	650L

MAX-OFC450	Flammable Storage Cabinet Outdoor	450L
MAX-OFC850	Flammable Storage Cabinet Outdoor	850L

Aerosol Storage Cages

Select the right storage for your aerosols with our wide range of products, we have a design to suit every use. Suitable for items such as paints, lubricants, insecticides, air fresheners and various other spray products, our storage cabinets will help you to safely store and organise your cans.

Aerosol Storage Cages

MAX-AC180

MAX-AC300

MAX-AC72

MAX-AC18

MAX-AC625

Product Code	Description	Capacity
MAX-AC18	Aerosol Storage Cage	18 can
MAX-AC72	Aerosol Storage Cage	72 can
MAX-AC180	Aerosol Storage Cage	180 can
MAX-AC300	Aerosol Storage Cage	300 can
MAX-AC625	Aerosol Storage Cage	625 can

Battery Charging and Storage Cabinets

Our battery charging and storage cabinets are used to safely store and charge batteries, particularly in industrial and commercial settings. In an event of failure or malfunction batteries can release hazardous substances including corrosive chemicals or flammable gases. Lithium-ion batteries also have the potential to catch fire if improperly charged or stored.

MAX-LIB250

Battery Charging and Storage Cabinets

Product Code	Description	Capacity
MAX-LIB30	Lithium-ion Battery Charging and Storage Cabinet	30 litre
MAX-LIB250	Lithium-ion Battery Charging and Storage Cabinet	250 litre

MAX-LIB30

MAX-LIB250

LPG Bottle Storage

LPG (liquefied petroleum gas) bottle storage is a critical aspect of ensuring safety in handling and storing propane or butane gas cylinders. Proper storage is essential to preventing accidents, leaks and potential hazards associated with these pressurised gas containers.

Forklift LPG Bottle Storage

Product Code	Description	Capacity
MAX-FGB2	Forklift LPG Bottle Store	2 Cylinder
MAX-FGB4	Forklift LPG Bottle Store	4 Cylinder
MAX-FGB6	Forklift LPG Bottle Store	6 Cylinder
MAX-FGB12	Forklift LPG Bottle Store	12 Cylinder

MAX-FGB12

MAX-LPG2	LPG Bottle Store	2 x 9kg
MAX-LPG4	LPG Bottle Store	4 x 9kg
MAX-LPG6	LPG Bottle Store	6 x 9kg
MAX-LPG8	LPG Bottle Store	8 x 9kg

Gas Cylinder Storage

Ensure the safety of stored gases and the surrounding environment by making use of our range of cylinder trolleys and cabinets. Proper ventilation is required to safely disperse any potential gas leaks. It is also essential to follow regulations and guidelines regarding the storage and handling of compressed gases to ensure compliance with safety standards.

MAX-GSC03	9 G Cylinders	787 x 762 x 1650mm
MAX-GSC04	16 Forklift Cylinders	1525 x 762 x 1650mm
MAX-GSC05	18 G Forklift Cylinders	1525 x 762 x 1650mm
MAX-GSC06	8 Forklift Cylinders + 9 G Cylinders	1525 x 762 x 1650mm

Corrosive Substance Storage

Corrosive substances are chemicals that can cause damage to materials, living tissues, or other substances through chemical reactions. The correct storage is required for safe containment and handling of materials that have corrosive properties. It's also important to have safety measures in place such as labelling, ventilation, and PPE.

Outdoor Corrosive Substance Storage

Product Code	Description	Capacity
MAX-OCC250	Small Outdoor Corrosive Substance Store	250L
MAX-OCC251	Small Outdoor Corrosive Substance Store	250L
MAX-OCC350	Small Outdoor Corrosive Substance Store	350L
MAX-OCC450	Small Outdoor Corrosive Substance Store	450L

MAX-EXCM

MAX-EXCL

Product Code	Description	Size
MAX-EXCL	Explosive Storage Day Box	Large
MAX-EXCM	Explosive Storage Cabinet	Medium

Organic Peroxide Storage Cabinets

Regular inspections, proper labelling and adherence of safety protocols are integral aspects of safely managing organic peroxides in the workplace. Organic peroxides are a class of chemicals that contain the peroxide functional group (-O-O-). They can be highly reactive and pose safety risks including the potential for combustion or explosion.

Organic Peroxide Storage Cabinets

MAX-OP30

MAX-OP100

MAX-OP160	Organic Peroxide Storage Cabinet	160L
MAX-OP250	Organic Peroxide Storage Cabinet	250L

Oxidising Agent Storage Cabinets

Oxidising agents are substances that can promote the combustion of other materials by providing oxygen. They pose a fire hazard and can react violently with combustible or reducing materials.

Storing them safely is essential to preventing accidents.

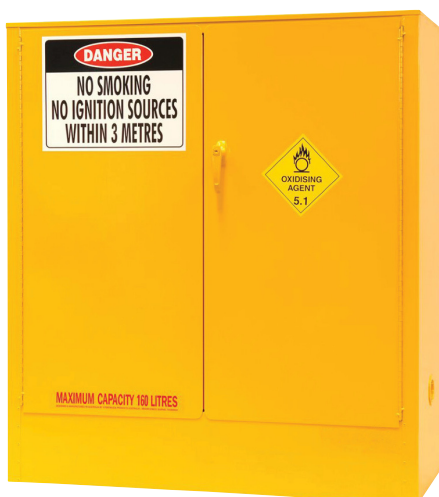

Oxidising Agent Storage Cabinets

MAX-OA30

MAX-OA100

MAX-OA250	Oxidising Agent Storage Cabinet	250L

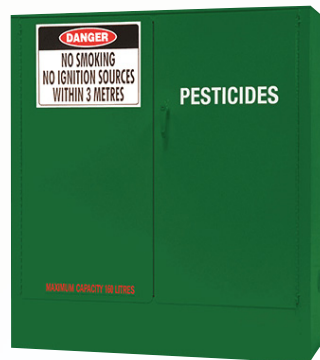

Pesticides Storage Cabinets

Safe storage of pesticides can contain hazardous material in the event of a spill or leakage amongst other benefits such as resistance to fire, ventilation, organisation, safety and compliance, security and prevention of contamination. Safe storage plays a crucial role in promoting responsible and safe handling of agricultural chemicals, protecting both human health and the environment.

MAX-PE250	Pesticides Storage Cabinet	250L

PPE Storage Cabinets

PPE Storage Cabinets

PPE Storage is an essential component of workplace safety management, helping to create a safe and efficient environment for individuals who need to use PPE in various settings.

Correct storage can help to maintain the integrity of the equipment, preventing damage or degradation and extend its lifespan by avoiding sunlight, high temperatures and corrosive substances. Hygiene can also be improved by storing items such as gloves and masks in a clean and hygienic environment, as well as emergency preparedness as a well organised PPE storage system means quick and easy access.

MAX-TX160	Toxic Storage Cabinet	160L
MAX-TX250	Toxic Storage Cabinet	250L

MAX-TX160

Storage of toxic materials help mitigate the risks associated with handling hazardous substances.

Our cabinets contribute to the overall safety of the workplace by providing a designated and secure storage solution. Safe storage will aid in the prevention of accidental exposure or spills, or contamination of harmful materials.
