SEGBOX
# Segregation Box

Product Code: MAX-SB001

Segregation Box for the transport of dangerous goods

Accumax Global introduces the SegBox, purpose built for the isolation of incompatible dangerous goods that need to be either transported or stored in close proximity to other chemicals. SegBox has practical design features for ease of handling, loading and longevity.

SEGBOX complies to Australian Dangerous Goods Code for segregation of packaging group II and III chemicals.

SegBox can also be used for transportation and/or isolation of food stuffs, detergents and non-dangerous goods where closed packaging could post a problem. MAX-SB001 has been designed to hold an Intermediate Bulk Container (IBC).

Product Code	Description	Dimensions	Weight
MAX-SB001	DG Forkliftable SegBox, Yellow, Suitable for a Pallet / IBC	1300mmx 1235mm x 1525mm H	350kg

SEGBOX – the isolation storage unit for the transport of incompatible goods on the same vehicle

Features and Benefits

- Ample clearance for 200 litre drums on pallet and 1000 litre Bulkie Boxes (IBCs)
- Four way forklift access
- Designed for ease of handling when laden
- Stackable design
- All steel construction, high impact tolerance, approved drop test design
- Recessed closure in door
- Easy reach handle
- High load capacity

SegBoxes have been designed to fit back to back on a standard two pallet wide truck with or without gates, or can be positioned side by side carrying two incompatible chemical products.

Example of SegBox used to facilitate legal transportation of incompatible chemical products on one truck. Note that you can also transport a 1000L IBC containing a packaging group II or III Dangerous Goods Rated Product using SegBox.
