Varibox Full Containment

Packing Chemicals can be Safer

The VARIBOX Full Containment (FC) has an integrated spill containment of 110%. This guarantees that you meet the highest standard in safety regulations.

- ✓ Protects you and the environment from any leakage
- ✓ No drip tray required

With the VARIBOX FC, you go one step further, it makes working with chemicals almost risk-free, because of the double-walled protection, no climbing, and ergonomic position.

The VARIBOX FC is applicable to different extractor tubes. To be 100% safe the containers are equipped with automatic venting in terms of a pressure relief vent or combi-vent.

- ✓ Pallet of recycled material
- ✓ <73% packaging waste*
- ✓ 99% Recyclable end-of-life time

Only the inner container needs to be replaced for up to 5 years, which helps you to save 73% on packaging waste.

The Standard in Safety

- Designed to reduce handling
- Creates a closed system
- Integrated spill containment

Sustainable and Re-Usable

- With a lifetime up to 10 years.
- Only 0.5L residue — save on cleaning costs and less chemical waste
- Recyclable pallet

Meets European Standards

- UN and ADR
- DIBt and AwsV
- PGS15 and PGS31
