Created to reduce fatigue, eliminate muscular-skeletal discomfort, and minimise noise, the mats are being used across a renowned WA Minesite in response to personnel experiencing discomfort caused by the vibration through the floor of the jumbos.

// Exposure to vibration can have long-term effects on personnel including damage to circulation, joints, muscles and sensory nerves. //

The specifically designed and crafted MaxSafe Anti-Vibration mats mean that your personnel can stay safe, avoiding time away from work or permanent disability from the effects of repetitive vibration.

Single Boom Jumbo Deck

An affordable, accessible, and more effective product than its counterparts, the anti-vibration mat can be designed to suit any heavy machinery deck.
