# 24/7 Monitored Spill Kit

EDITION 2

A revolutionary concept, designed and developed to ensure safety and seamless processes for spill control in any industry and workplace. Our MAXSorb Spill Kits are now available in a new variation, technology and expertise combine to bring you monitored spill kits.

Have peace of mind as you're notified when a spill kit on site is opened, replace it efficiently to ensure your team will never be without the tools they need to keep safe.

## Ease the Monitoring of your Spill Kits, from your Desk.

### Monitored Spill Kit Benefits

- » Spill Kits conveniently monitored from your desk.
- » Reliability ensured with no more partially full kits when they are required.
- » Cease the incorrect use of Spill Kits, a Monitored Spill Kit system means they cannot be utilised for general waste.
- » Stay ahead of spills, Monitored Skill Kits provide the opportunity to record any spills in meaningful way to help with company insurance and premiums.
- » Available in General, Oil and Fuel and Hazchem.
- » Improve operational efficiency with a simple re-order process.

### The Problem Versus The Solution

#### The Problem

Are you confident your Spill Kit is full?

#### The Solution

Our Monitored Spill Kits will ensure your team are never under-resourced in the event of a spill.

# How Does it Work?

## Product Features and Functionality

Remotely monitor any Monitored Spill Kit onsite following these steps:

- » Retro-fit an existing standard spill kit or purpose an entirely new Monitored Spill Kit.
- » Apply for the Spill Kit monitoring interface. Name and match all spill kits onsite.
- » Activation. Monitored Spill Kits are geo-mapped with a location and I.D, trackable in real time providing quality data.
- » Once activated, the Spill Kit sends a signal regularly and when opened or moved will communicate an alert to the control panel.
- » An immediate response plan is triggered to get the Spill Kit refilled and back online and available for next use.

# Technical Specifications

The MAXSorb Monitored Spill Kits have been specifically designed and engineered by Accumax Global, in collaboration with one of Australia's leading technical experts. A concept that is beyond innovative, providing a solution to any worksite. This truly is a combination of technology, expertise and knowledge that is groundbreaking, saving time whilst ensuring worksites are prepared to manage and contain any spill.
