Eye Wash

Eye Wash Duo

The 1000 ml Saline Eye Wash Duo Bottle with 0.9% sterile sodium chloride contains 1000ml eye wash, which provides a longer rinsing effect. The 500 ml pH Neutral Eye Wash Duo comes in a handy bottle with 4.9% sterile phosphate buffer that will quickly neutralize acids and alkali.

The ergonomic DUO eye cup makes it possible to rinse both eyes at the same time. The bottle can be used individually or as refill at DUO eye wash stations and boxes.

Product Code	Description	Rinsing Time
AM-H7584	1000 ml Saline Eye Wash Duo	about 5 mins
AM-H7583	500 ml pH Neutral Eye Wash Duo	about 2 mins

AM-H7583

AM-H7584

Eye Wash Duo – Wall Mount

The Wall station comes 1000ml Saline Eye Wash DUO or with 500 ml pH Neutral Eye Wash DUO and 1000 ml Saline Eye Wash DUO. Particularly suitable for places where there are risks for both eyes to be affected by foreign bodies, acids, and alkali.

AM-H7554

Dust-proof wall station in impact-proof polystyrene with 500ml pH Neutral Eye Wash DUO and 1000ml Saline Eye Wash DUO. Particularly suitable for dusty production areas.

AM-H7543

AM-H7541

Product Code	Description	Packaging	Dimensions
AM-H7543	Saline Eye Wash Station Duo – Wall Mount	1	375mm x 180mm x 95mm
AM-H7541	Saline / pH Combi-Station Duo – Wall Mount	1	377mm x 250mm x 95mm
AM-H7554	Combi-Box Duo Maxi – Wall Mount	1	357mm x 252mm x 116mm

How to Use Eye Wash Duo

Duo Eye Wash is easy to use if an accident happens

Turn the eye cup in the direction of the arrow until the seal breaks

Lean back, squeeze the bottle and rinse

The eye can also be rinsed while you lean forward, by squeezing the bottle gently

Wall Mount Eye Wash

Product Code	Description
AWD501	Emergency Eyewash Station – Wall Mount. Comes with two eyewash bottles.
AWDREF500	500ML Eyewash Bottle with Eye Cup

AWD501

AWDREF500

Gravity Fed Portable Eyewash

Gravity Fed Eye Wash Stations are designed to be used in situations where a persons eyes have been exposed to hazardous or corrosive materials and a continuous supply of water is not available.

The Eye Wash unit can be installed in a wide variety of locations. Seconds can make the difference and the versatility of the Gravity Fed Portable Eyewash increases the chance of preventing serious eye injury.

FEATURES

- » 2.6 L/min Flow Speed
- » Contains two ABS spray heads with rubber dust covers
- » Complies with AS 4775
- » Drainage hole at the base of the unit makes it easy to discharge and clean

Product Code	Description	Capacity	Flush Time
AM-S7500	comes with Wall Mounting Bracket	60 L	18 minutes
AM-S7501	comes with Wall Mounting Bracket	30 L	9 minutes
AM-S7502	comes with trolley and locking breaks on wheels	60 L	18 minutes

Easy to use, just pull the rubber strap to activate

Solar Mobile Safety Shower and Eye Wash Station

FEATURES

- ✓ Stainless Steel fold up Shower
- ✓ Stainless Steel fold up Eye/Face Wash
- ✓ 1500 Ltr Water Tank
- ✓ 5mm Colorbond Steel Skin
- ✓ 235 amp deep cycle battery
- ✓ Battery isolation switch
- ✓ Battery power level indicator
- ✓ Green LED light on shower head
- ✓ Water level and temperature gauge
- ✓ Full signage and reflective tape
- ✓ Skid mount for transport
- ✓ Cyclone rated

This completely self-contained, Mobile Safety Shower and Eyewash Station has been designed for use in remote area applications. Designed and made in Australia, the units are fully trailer mountable and are either Battery Powered or Solar Powered, with enclosed 1250L or 1500L water tanks.

The Battery Powered station, when charged, can run the emergency shower and eye wash for up to 40 hours.

FEATURES DEPENDING ON UNIT TYPE

- ✓ Solar panels
- ✓ Galvanised 2 tonne tandem axle trailer

FE-STR	Security Tie - Red
FE-STY	Security Tie - Yellow

Extinguisher Bags

The UV treated plastic extinguisher bags are designed to protect fire extinguishers from harsh indoor production areas or dusty outdoor environments.

Fire Blankets

Fire blankets are effective in cases of minor fires without the mess associated with fire extinguishers. Complies to AS/NZS 3504.

SDS Signs

SDS Signs

SDS Signs indicate where Safety Data Sheets, documents providing information on the properties of hazardous chemicals and their effect on health and safety, are located within the workplace.

Clearly indicating where SDS binders and sheets are kept for easy usage is an integral part of ensuring your workplace complies with Safe Work Australia Standards.

Product Code	Size	Description
511LACM	600 x 450mm	Alucabond
511LSACM	450 x 300mm	Alucabond

SDS Holders

Safety Data Sheets (SDS) Wall Mount Stations, holders and signs are effective ways of ensuring critical information are protected, accessible and can easily be located whenever needed. We offer both indoor and outdoor solutions to efficiently organise safety and/or emergency information.

Lockable Emergency Info Cabinet

Robust Outdoor Storage Cabinet for mounting at entrance of property for emergency information.

Product Code	Dimensions
MB108	430 x 330 x 120 mm
MB106	500 x 500 x 160 mm

SDS Binders and Outdoor Holder

SDS Binders enable a highly visible way of storing SDS Documents and often used in conjunction with the wall mount SDS stations for mounting near doorways.

Product Code	Description
SDSB	A4 Binder – Red/White
SDSY	A4 Binder – Black/Yellow
SDH409	Outdoor SDS holder A4; holds 1 x SDS Binder

RT3YB	Yellow/Black, Class 2	50mm x 47.5m

Our Reflective Tapes are visible in all conditions. They help prevent accidents in various facilities particularly in areas with safety concerns or low lighting conditions.

Safety Steps

MAXSafe Safety Step offers a range of portable solutions to increase individual height without compromising safety and efficiency. The increased reach can lessen the stress on your worker's arms and shoulders, improving overall productivity. Ideally used for accessing elevated storages or performing tasks that need extended reach but do not require a full-sized ladder.

Longstep — Yellow

Our Longstep - Yellow provides a wider base for a superior foot stance and increased stability. It also lessens the need to reposition the platform during prolonged use. Made heavy duty to handle the tough Australian conditions.

RSPL1000

Safety Step – Orange

The Safety Step - Orange is made lightweight yet strong and durable with its single mould construction.

RSPL400

Rectangular 2 Step – Yellow

Our Rectangular 2 Step — Yellow Made with moulded non-slip tread and handles.

Cable Ties

Product Code	MAX-STCT
Description	Cable Ties - PK/100

The MAXSafe® Scaffold Tag eliminates the limitations of the traditional scaffold tag, by not having to be hung on the scaffold tube. This means that the MAXSafe® Scaffold Tag does not need to be cut or modified to fix in the best place in every situation.

MAXSafe® Scaffold Inspection Tags don't need to be removed or altered throughout the scaffolding process and also has the outstanding feature of being able to extend the certification stage by simply adding an insert tag. Up to 10 inserts can be added per tag.

MAXSafe® Scaffold Tags are the best single package solution in almost every situation for ensuring safety for all users of the scaffold. Designed for use on all work sites, always providing the highest level of safety and compliance.

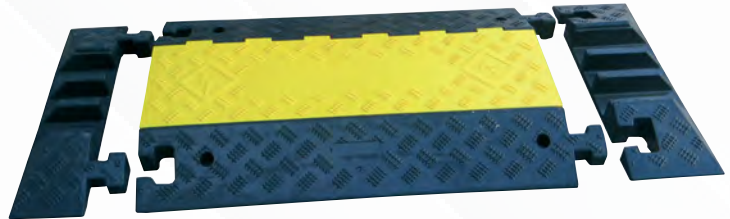

FEATURES

- ✓ Ultra tough poly construction, virtually untearable
- ✓ Scaffolder friendly
- ✓ Meets and exceeds AS standards
- ✓ Extremely versatile – not limited to where, or how to hang it
- ✓ Cost effective and re-usable
- ✓ Total message on one page
- ✓ Clear to all persons who access scaffold – not just scaffolders
- ✓ High wind resistance
- ✓ Impervious to dust, dirt and grime

Electrical Safety

Rubber Cable Cover

- ✓ Non Conductive & Economical Cable Protector
- ✓ Suitable for pedestrian and light vehicle traffic
- ✓ 3 good size channels for a variety of cord sizes
- ✓ Hinged Lid for ease of use
- ✓ Safety Yellow Lid with Anti-Slip Surface
- ✓ Suitable for indoor & outdoor use
- ✓ Male/Female interconnect system means you can form your needed length quickly and easily
- ✓ 3x Channels at 60mm W x 50mm H

Product Code	Description
SRCC3	Channels suit up to 3 cables
SRCEC	End caps to suit - pair

Heavy Duty, Load Rated Pu Cable Cover - 3 Channel

Our Heavy Duty Cable Cover - 3 Channel is made from polyurethane for extended durability, ensuring protection of electrical cables against harsh work environment. It features a hinged lid for easy placement and removal of cables.

- ✓ Male/female connections for any length you require
- ✓ UV stable for outdoor use
- ✓ Hi-viz orange and yellow
- ✓ Anti-slip surface on top and sides
- ✓ Rated to 4.5 T per tyre
- ✓ Suit up to 3 Cables
- ✓ 3 x Channels each 58mm H x 65mm W

Site Vehicle Safety

Wheel Stops

MAXSafe® Wheel Stops are designed to inhibit encroachment into an opposing parking space, or contact with high curbs. Suitable for both outdoor and undercover parking areas.

Rubber Wheel Stops

Rubber Wheel Stops are moulded from a tough, recycled rubber compound and are finished with highly visible yellow marker plates. Complies with Australia Standard AS2890.1:2004

MAXSafe® Rubber Wheel Stops

MAXSafe®
Concrete Wheel Stops

Concrete Wheel Stops

Concrete Wheel Stops are designed to mind specifications and comes with Galv Pins to suit.

Asphalt Spikes

To suit Rubber Wheel Stop. Simply hammer into any asphalt surface

MAXSafe® PVC Guide Post

The MAXSafe® PVC Guide Post is perfect for any site where delineation is required on the edge of roads, walkways etc.

KEY FEATURES

- ✓ Flexible
- ✓ UV stabilised
- ✓ Comes with reflective delineators on both sides

MAXSafe® PVC Guide Post

Product Code: AMGPPVC1

Dimensions: 100 mm W x 1350 mm H

Delineators

Using your current Site Traffic Management Plan, install the posts as required in either one metre lengths for centre bunds or two metre lengths for outer edge of haul roads to highlight intersection traffic flow. The configuration is up to you.

Solar Powered Guide Post

The Guide Posts are designed 1m high. Ribbed at joint for extra strength, the guides posts can be joined to form any lengths. They can be manufactured to be bio-degradable.

FEATURES

- » Directional one - way threads
- » Recessed 3M Diamond Grade
- » Locking blister
- » Reflective sticker
- » Custom UV resistant dye
- » Recyclable

With flexible configuration options you can use your current traffic management system to install the posts as required. Unlimited applications of the solar delineators are available, the system is not limited to haul roads, but are adaptable to various environments where improved visibility, safety and guidance are needed.

BENEFITS

- ✓ No more looking for your turning point
- ✓ No more second guessing where to go
- ✓ No more turning at the next intersection to go back
- ✓ Simply follow the road like it was the day time
- ✓ The Guidance System was designed to be seen from a great distance during the day or night
- ✓ Operators can plan their actions from hundreds of metres out

Solar delineators support ESG targets by offering an environmentally friendly, costeffective, and socially beneficial solution for use in any application and industry, aligning with broader goals or sustainability and community well-being.

Solar Powered T-Top Bollard

The IGS® Bollard is a next-generation upgrade to the standard T-Top bollard, designed to improve safety and visibility at roadwork and temporary traffic management sites. Approved for use across all jurisdictions in Australia and New Zealand, the IGS is powered by a solar-charged battery and engineered with innovative illumination technology to guide drivers safely at night while reducing distraction. Fluorescent materials ensure the bollard remains highly visible during the day, making it a reliable, 24-hour traffic control solution. Ausroad approval notification confirms compliance with national standards and conditions of use.

FEATURES

- » Advanced self-illuminating design powered by solar-charged battery
- » Soft night-time glow enhances driver guidance without glare
- » Fluorescent finish for daytime visibility
- » Reduced light emissions for environmental consideration
- » Compliant with Austroads Guide to Temporary Traffic Management

BENEFITS

- » **Improve tender success regarding infrastructure suitability**
- » Improves visibility and driver awareness in both day and night conditions
- » Enhances worksite safety while minimising driver distraction
- » Reliable, self-sufficient solar power reduces maintenance demands
- » Approved for use throughout Australia and New Zealand
- » Practical upgrade from standard T-Top bollards, ensuring compliance and safety confidence

MAX-STTOPBC-S

Product Code	Description
MAX-STTOPBC-S	MAXSafe Solar T-Top Bollard Complete with Light, c/w 8kg Base
MAX-STTOPBC-B	MAXSafe Solar T-Top Bollard Complete with Light, c/w 8kg Base - Box 26
MAX-STTOPBC-P	MAXSafe Solar T-Top Bollard Complete with Light, c/w 8kg Base - Pallet 130

MAX-STTOPLT-S

Conditions of Use:

The IGS® Bollard must not replace higher-level temporary traffic management controls where required. All conditions of the Austroads Guide to Temporary Traffic Management apply. Recommended for use in ACT, NSW, NT, SA, VIC, and WA.

DeliniMate

With its excellent durability, 100% recyclability, ease of installation & highly cost effective price tag, "DeliniMate™" is the most environmentally conscious choice, for an essential item.

FEATURES

- » Made from 100% recycled plastic
- » Comes with either CLASS 1 reflective 50mm x 200mm red and white delineators
- » 45-degree cut on the bottom to help it drives into the ground.
- » Fits over 900-1,650mm metal/FRP star pickets, or simply on top of BaseMate, leaving NO sharp edges for optimal safety
- » Packed in bundles of 10 and wrapped in 100% recycled PE bags to keep them clean
- » The triangle shape of the post stops it from twisting to avoid the post facing the wrong way

Product Code	Material	Size
MAX-GP1200	Recycled plastic	1200mm
MAX-GP1500	Recycled plastic	1500mm

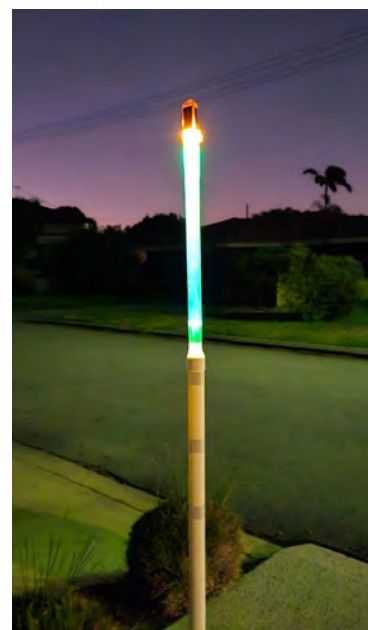

IllumiMate

IllumiMate has NO sky facing solar panels which catch dust and need cleaning every week. All the solar panels are vertical and no dust will hold on to the panels to block out the light and reduce the charging.

FEATURES

- » Fast setup
- » No ground penetration.
- » No tools or hitting implements required.
- » Recycled plastic materials.
- » Night-time Illumination.
- » Easy to store and transport.
- » Aussie made.
- » Highly cost effective.

Product Code	Description
MAX-IMLED	Illumimate Kit – White LED Solar Powered Light, complete with 1200mm Recycled White Plastic DeliniMate and BaseMate

BaseMate

FEATURES

- » Made from 100% recycled plastic and are in black to increase the UV resistance
- » Designed for areas that are close to underground assets like power, water and gas etc or areas that are too hard to penetrate
- » Simply put a 6 or 8kg weight over the top to hold them down
- » Holes in the base if tent pegs are needed
- » Can hold normal steel or FRP star pickets

Product Code	Description	Material
MAX-MMBM	Holds DeliniMate and IllumiMate	Recycled Plastic

Pyramid Cones

Pyramid Cones

Made from tough moulded plastic, our pyramid cones are more stable than traditional traffic cones, particularly useful in high wind areas.

Three faces available for messages make them ideal for identifying temporary areas such as blast zones or other restricted access situations.

Our pyramid cones are stackable for compact transport and storage.

FEATURES

- ✓ Made from tough moulded plastic
- ✓ 3 faces available for custom messages
- ✓ Customise with any text on reflective
- ✓ Ideal for identifying temporary areas such as blast zones or other restricted access situations & car parks
- ✓ Stackable & UV stabilised
- ✓ For use with solar warning beacons & Reflectaline®

COLOUR:     

SIZE: 600mm or 900mm height

WEIGHT: 4kg or 9kg

Available in two sizes & five colours

Our safety cones can be supplied with your own customised message.
Call us for further information.
